Yes.

Seems like providing for mobility/accessible parking has been done and separating out loading zones from them.

Plus where there is existing provision made that basically counts.

Thanks Joanne – that’s really helpful. Are you content that KCDC proceeds without the need for a hearing provided those same provisions are adopted by the Council?

Kind regards

Christine

The proposed amendments are fine.
Thanks for the work in finalising these!

Joanne

Good afternoon Joanne – I trust you are well.

There have been some staff changes at KCDC and I’m just picking up the PC1A and PC1C threads to try and get this finalised for a November Council meeting. You will recall that we discussed and agreed some amendments to the wording of PC1A that settled the matters raised in your submission on behalf of the Kāpiti Disability Advisory Group.

Those agreed amendments have been incorporated into the wording of PC1A (shown in red) in the attached Attachment 1. These are attachments to a report I am finalising that will recommend to the Council that they accept the amendments and mean there is no need for a hearing.

It's been a while since we discussed this, so I have also adapted the table we prepared detailing the changes intended to address the submission points – to show where in PC1A the agreed amendments have been made. Hopefully, that will all be straightforward to digest. KCDC and I have made some purely editorial amendments, in addition to the substantive amendments we agreed. These include changing 'accessible car parks' to 'accessible car parks' for consistency and italicising that expression, and other similar minor grammatical corrections. Also, we have had to delete the proposed amendment to the 'Medium Density Housing Design Guideline' that was included as Amendment No. 9 in PC1A. That is because that Design Guide doesn't exist any more in the District Plan – it was deleted as part of decisions on submissions to Plan Change 2. Accordingly, I have shown Amendment 9 as deleted in the attached version of PC1A.

The purpose of this email is to seek your confirmation that the proposed red-tracked amendments are recorded as we discussed earlier this year and that, provided those red-tracked amendments are made to PC1A, the Disability Advisory Group is content to withdraw its request to be heard so that the amended plan change can be confirmed by the Council without the need for a hearing.

KCDC's plan is to try and get this on the order paper for a meeting in late November – so the agenda deadline will be in the next week or so. Would you be able to get back to me some time early next week?

If you want to discuss any aspect of the attached or this email, please contact me by phone or email.

Many thanks Joanne and kind regards

Christine
